

Genetic Fingerprinting

Recombinant DNA Technology

Using Genome Projects

Gene Expression and Cancer

Regulation of transcription and translation

Required Practical 7 - Use of chromatography to investigate the pigments isolated from leaves of different plants, e.g. leaves from shade-tolerant and shade-intolerant plants or leaves of different colours

Nutrient Cycles

Fertilisers & Eutrophication

Energy Transfer in Ecosystems

Photosynthesis

Respiration

Required Practical 2 - Preparation of stained squashes of cells from plant root tips; setup and use of an optical microscope to identify the stages of mitosis in these stained squashes and calculation of a mitotic index

All Cells arise from other cells

Biodiversity within a community

Required Practical 3 - Production of a dilution series of a solute to produce a calibration curve with which to identify the water potential of plant tissue

Genetic Diversity and Adaptation

Surface area to volume ratio

DNA and Protein synthesis

Digestion and Absorption

Mass transport in plants

Haemoglobin

Required Practical 5 - Dissection of an animal or plant gas exchange or mass transport system or of organ within such a system

TEACHER 2

Year 12

BIOLOGICAL MOLECULES

Water

DNA Replication

Many Proteins are Enzymes

Lipids

Carbohydrates

TEACHER 1

Year 13

GENETIC INFORMATION, VARIATION AND RELATIONSHIPS BETWEEN ORGANISMS

Investigating biodiversity

Species and taxonomy

Genetic Diversity can arise as a result of mutation during meiosis

Survival & Response

Control of Heart Rate

Nerve Impulses

Synaptic Transmission

Required Practical 6 - Use of aseptic techniques to investigate the effect of antimicrobial substances on microbial growth

DNA, Genes and Chromosomes

Haemoglobin

Required Practical 5 - Dissection of an animal or plant gas exchange or mass transport system or of organ within such a system

TEACHER 2

Year 12

ORGANISMS EXCHANGE SUBSTANCES WITH THEIR ENVIRONMENTS

CELLS

Methods of studying cells

Inorganic Ions

ATP

Structure of DNA & RNA

Cell recognition and the immune system

Gas Exchange

General Properties of Proteins

Monomers & Polymers

Mass transport in animals

Required Practical 5 - Dissection of an animal or plant gas exchange or mass transport system or of organ within such a system

TEACHER 2

Year 12

BIOLOGICAL MOLECULES

Water

DNA Replication

Many Proteins are Enzymes

Lipids

Carbohydrates

TEACHER 1

Year 13

GENETIC INFORMATION, VARIATION AND RELATIONSHIPS BETWEEN ORGANISMS

Investigating biodiversity

Species and taxonomy

Genetic Diversity can arise as a result of mutation during meiosis

Survival & Response

Control of Heart Rate

Nerve Impulses

Synaptic Transmission

Required Practical 6 - Use of aseptic techniques to investigate the effect of antimicrobial substances on microbial growth

DNA, Genes and Chromosomes

Haemoglobin

Required Practical 5 - Dissection of an animal or plant gas exchange or mass transport system or of organ within such a system

TEACHER 2

Year 12

ORGANISMS EXCHANGE SUBSTANCES WITH THEIR ENVIRONMENTS

CELLS

Methods of studying cells

Inorganic Ions

ATP

Structure of DNA & RNA

Cell recognition and the immune system

Gas Exchange

General Properties of Proteins

Monomers & Polymers

Mass transport in animals

Required Practical 5 - Dissection of an animal or plant gas exchange or mass transport system or of organ within such a system

TEACHER 2

Year 12

BIOLOGICAL MOLECULES

Water

DNA Replication

Many Proteins are Enzymes

Lipids

Carbohydrates

TEACHER 1

Year 13

GENETIC INFORMATION, VARIATION AND RELATIONSHIPS BETWEEN ORGANISMS

Investigating biodiversity

Species and taxonomy

Genetic Diversity can arise as a result of mutation during meiosis

Survival & Response

Control of Heart Rate

Nerve Impulses

Synaptic Transmission

Required Practical 6 - Use of aseptic techniques to investigate the effect of antimicrobial substances on microbial growth

DNA, Genes and Chromosomes

Haemoglobin

Required Practical 5 - Dissection of an animal or plant gas exchange or mass transport system or of organ within such a system

TEACHER 2

Year 12

ORGANISMS EXCHANGE SUBSTANCES WITH THEIR ENVIRONMENTS

CELLS

Methods of studying cells

Inorganic Ions

ATP
